

GYS - Booster Pack

In January of this year GYS introduced GYSPACK PRO 12.24, which is a self-contained 12V and 24V booster pack, designed for high performance and long life.

This mobile battery booster pack delivers a maximum 6,200A for a 12V battery and 3,100A for a 24V battery. This pack when fully charged is sufficient to start up to 28 trucks with 12V batteries or 16 start ups on 24V batteries between re-charging.

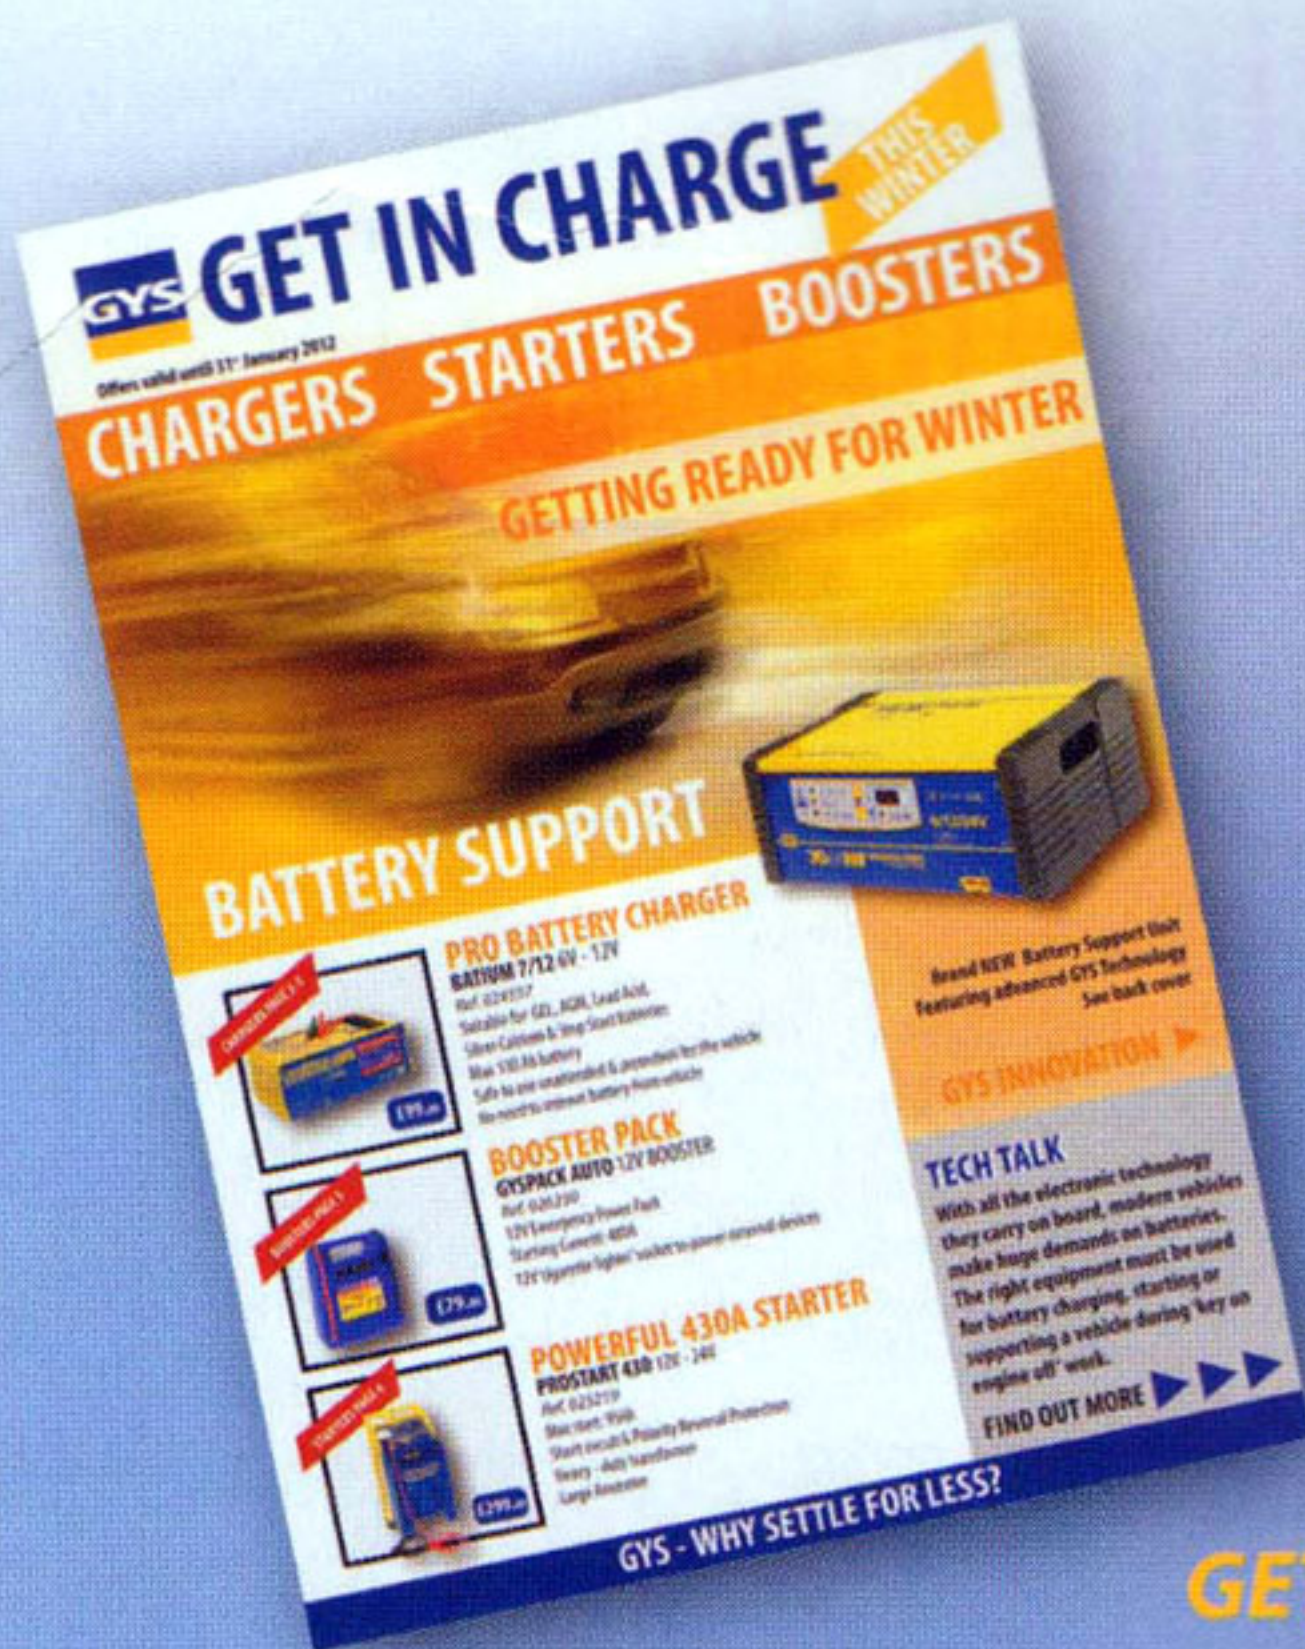

This charger is microprocessor controlled, with Multistage Charging Curve that will maintain the charge in the unit to the maximum and prolong its operating life.
